Labeling of Hazardous Art Materials Act (LHAMA) Cover Page

The following samples were submitted and identified on behalf of the client as:

BARELL O SLIME 4 COLORS (1 formula)

Net Weight : 120G
Item No. : G16288
Region of Origin : CHINA

Sample Information Received : FORMULATION WITH CHEMICAL NAME, CAS NO. AND PERCENTAGE
Order Receiving Date : APR 06, 2023
Assessment Period : APR 06, 2023 TO APR 14, 2023

Service Requested

For compliance with Labeling of Hazardous Art Materials Act (LHAMA) and the criteria outlined in ASTM D-4236 for the said product per information provided.

Conclusion

The submitted formula(s) comply with Labeling of Hazardous Art Materials Act (LHAMA) provided that the parameter given in the section "Labeling practice" has been indicated on the product label.

ASTM D4236 - Labeling of Hazardous Art Materials Act (LHAMA) Report

The formulation of BARELL O SLIME 4 COLORS is reviewed according to the US Consumer Product Safety Commission's guideline at 16 CFR 1500.135 and the criteria outlined in ASTM D-4236.

In this review the available data, including the relevant data from the National Toxicology Program (NTP), International Agencies for Research on Cancer (IARC) and other sources in the National Library of Medicine Data Bank were considered to assess the need for chronic health hazard warning. The carcinogenicity, reproductive hazard, neurotoxicity, bioavailability and potential exposures were also considered and in the absence of specific data, a reasonable judgment was made to assure a realistic assessment of the hazard on the ultimate art material package.

The review is based only on the submitted formulas (*Appendix-1*) which were submitted and identified by/on behalf of the client, assumed to be valid and accurate. The ingredients used shall fulfill corresponding purity requirements. The polymer (if present) is assumed to be well-cured and the ingredients in this product are assumed to contain no contaminants or residues at level that would cause chronic toxicity among users when used for its intended purpose. If there is any alteration to this formula or if heavy metal contamination such as lead is detected in this product, it will void this certification.

The product is intended for disposable, the soft glue will stick to the hand when taken out, and it can be used normally after being rubbed with force for about 10 seconds by population of 6 years old and above as client claims for art creation. None of the ingredients at a level found in this product is expected to pose any significant chronic adverse health effects in consumers with customary use. Taking into account this information it is considered that, in the present state of knowledge, the submitted formulations put on the market are unlikely to cause chronic toxicity among users, when used for its intended purpose.

Labeling Practice:

The following parameter should be indicated on the product label conspicuously and legibly.

CONFORMS TO ASTM D-4236

HONGJING XU MB, MPH,
Diplomate, American Board of Toxicology,
European Registered Toxicologist,
Certified Toxicologist of CSOT
Certified Cosmetic Safety Assessor
