Phthalates in costume packaging and storage case	Marin Superior Court CIV 1604382 / Solvent extraction with GC-MS/LC-MS analysis	[Vinyl / PVC Costume packaging and costume storage case] Product shall not contain more than 0.1% (1000 ppm) each of DEHP, DBP, DINP, DIDP, DnHP and BBP. Labeling is not allowed by consent judgement. Note: - Composite up to 3 like materials. If the composite result exceeds the adjusted limit (regulatory limit divided by the number of components), individual materials will be analyzed. - Applicable to all costume and costume accessories packaging and storage cases. - Actual testing would be conducted on all accessible PVC/vinyl substrates and surface coatings. - BVCPS recommend all products shall provide documentation or material bill for material identification. If documentation is not provided the Beilstein test will be conducted on all plastic substrates to confirm the presence of PVC. - Vendor is responsible for compliance of all other materials.
