PERFORMANCE			
North America			
Actual use - functionality	SGS In-House Method	Shall function as intended as received. Report details of evaluation (features tested / methods used / materials used / etc.) Report any features not evaluated.	PASS
Odor	SGS In-House Method	[Odor And Taste] Shall have no change in the taste or odor of food	N/A
*Resistance to penetration - oil	SGS In-House Method	[Parchment and wax paper products only] Submerge sample in cooking oil for 1/2 hour. Hang to drip for 30 seconds. Weigh product before and after. Report actual % increase in weight. Shall be maximum of 10% absorption by weight.	/ Waived by buyer
Effects of heat	SGS In-House Method	[Parchment product only] No melting – place in preheated 350°F oven, remove @ 1 hour cool, repeat if no damage at 400°F for 1 hour cool	PASS Observation: Color change was found.
Foil dispensing ease	SGS In-House Method	[Roll] Shall be easy and evenly to pull	N/A
Blade cutting performance	SGS In-House Method	Shall provide effective / easy cutting of product while dispensing	N/A
Dispenser function	SGS In-House Method	Report actual. Shall function as intended as received.	N/A

- Remark :
1. N/A = Not Applicable
 2. N/C = Not conducted as per client's request

Test Result 1:

**US FDA 21 CFR 176.170 (Paper and Paperboard) –
Determination of Amount of Net Chloroform Soluble Extractives**

Method : With reference to US FDA 21 CFR 176.170.

Extractants	Test Condition	Result (mg/inch ²)	Reporting Limit (mg/inch ²)	Permissible Limit (mg/inch ²)
		1		
Distilled Water	250°F for 2 hours	ND	0.2	0.5
n-Heptane	150°F for 2 hours	ND	0.2	0.5
Comment	--	PASS	--	--

Sample Description :

1. White paper (Baking cup)

- Note :
1. mg/inch² = milligram per square inch
 2. °F = degrees Fahrenheit
 3. ND = Not Detected

Remark:

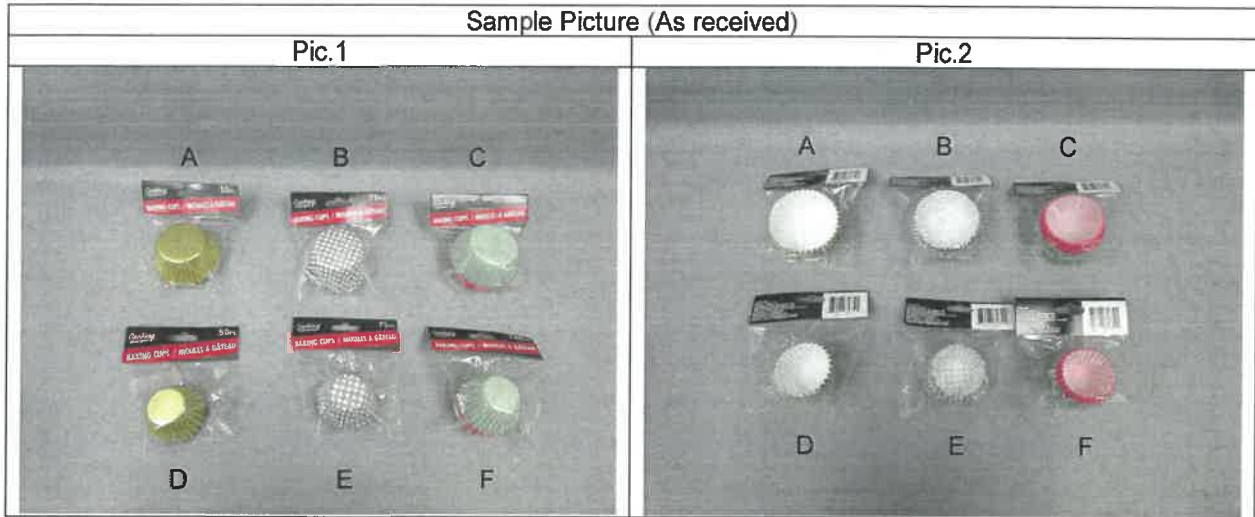

When statement of conformity is made, unless inherent in the requested specification or instructed by the applicant, the decision rule would be based on the non-binary statement with guard band (is equal to the expanded measurement uncertainty with a 95% coverage probability, $w = U_{95}$) in ILAC-G8:09/2019 Clause 4.2.3.

“Pass - the measured value is within (or below / above) the acceptance limit, where the acceptance limit is below / above to the guard band.” or “Pass - The measured values were observed in tolerance at the points tested. The specific false accept risk is up to 2.5%.”

“Fail - the measured value is out of (or below / above) the tolerance limit added / subtracted to the guard band.” or “Fail - One or more measured values were observed out of tolerance at the points tested”. The specific false reject risk is up to 2.5%.

“Inconclusive – It is not possible to state the conformity. Either one or more measured values were observed in the portion of the expanded measurement uncertainty intervals at the points tested where the specific risk is up to 50%.”
