TEST SUMMARY:

Total Lead and Cadmium Content in Artist Paints and Pigments – Client’s Request to Test According to the Reformulation Level(s) Set forth in the Consent Decrees of Similar Products (Court Case No.: San Francisco Superior Court, 306481)

Test Item	Result (ppm)		Conclusion
	Total Lead (Pb)	Total Cadmium (Cd)	
A1	<1	<1	PASS (See Remark)
A2	<1	<1	PASS (See Remark)
A3	<1	<1	PASS (See Remark)
A4	<1	<1	PASS (See Remark)

Method: Sample was digested with reference to EPA 3052. The lead content was analyzed by Inductively Coupled Plasma Mass Spectrometer.

Remark: Proposition 65 requires businesses to warn Californians about exposures to certain listed chemicals known to cause cancer, birth defects, or other reproductive harm. If a business exposes a Californian to a listed chemical without providing a warning, then the business may be sued for the possible violation of Proposition 65. The business will then have the burden of proving that the listed chemical in the product is under the safe harbor limit or that the anticipated exposure level will not pose a significant risk of cancer or reproductive harm.

The reformulation levels set forth in the Consent Decrees of similar products to the Sample are **12.5 ppm for Lead (Pb) and 2.5 ppm for Cadmium (Cd) respectively**. The reformulation levels set forth in the various Consent Decrees are only the binding requirements for the defendants named in the case, and by complying with the reformulation requirements, the defendants are protected from further Proposition 65 violations for the products that are covered in the case. However, the reformulation levels set forth in the various Consent Decrees are not necessarily the safe harbor limits. The reformulation levels set in the Consent Decrees are usually expressed in relative concentration levels (i.e., mg/kg, ppm) while the safe harbor limits identify a level of exposure to a listed chemical in micrograms per day. Therefore, for businesses that are not named in the Consent Decrees as defendants, complying with the reformulation levels of Consent Decrees does not fully protect the businesses from being sued for the possible violation of Proposition 65. These businesses may still be sued for the possible violation of Proposition 65 and will have the burden of proving that the listed chemical in their products are under the safe harbor level or that the anticipated exposure level will not pose a significant risk of cancer or reproductive harm.

If your product contains any amount of a listed chemical, the only way to fully avoid the possibility of the burden of proving that the listed chemical in your product is under the safe harbor limit or that the anticipated exposure level will not pose a significant risk of cancer or reproductive harm is to provide a warning about the exposures to the listed chemical known to cause cancer, birth defects, or other reproductive harm. Please consult MTS for more details regarding the different options of labeling and the mechanics of labeling.

“>” = more than
